

Connecting Students -- Interacting through Online Activities

Pam Rankey, Associate Professor
Business and Economics Department
University of Cincinnati, Blue Ash College

Intended Session Outcomes

- Identify several student activities that facilitate student to student interaction.
- Create a short activity that emphasizes student-student and/or student-content interaction.
- Define a process to facilitate the planned activity.

Topics/Agenda

- Student Engagement
- Activity Planning
- Group Projects
- Sample Activities with Student Interaction
- Your Turn

Engagement

- QM Standard 5
 - Learning Activities and Learner Interaction
 - 5.2 Opportunities for interaction that support active learning
 - Student to Student
 - Student to Content
 - Student to Instructor

The Role of the Instructor

Student to Instructor

- Instruction
- Scaffolding
- Formative feedback
- Summative feedback
- Assessment

Planning Activities

- Consider alternatives to traditional online discussion boards (read and post)
- Think about an activity that you might use in a face to face class:
 - What happened? What did you do and how did students receive it?
 - What made it work well?
 - How can you adapt it to go online?

Include Reflection

Meaningful reflection on learning leads to deep and lasting learning

- Students know what they have learned
- Students remember what they have learned

Group Work

- Scaffolding
- Clear instructions
- Small low stakes project or activity first
- Intermediary assignments
- Model activities
 - I require all student to meet with me in WebEx, then I ask them to meet with their teams in WebEx and send me a picture

Activity Design

- Focus on designing a structured, interactive activity – consider using technology or an LMS feature in a new way
- Use this opportunity to increase engagement or try something new
 - a. Not just a word document with a response
 - b. Not just a single blog or discussion board posting
 - c. Not just an open question in a discussion board

Planning Student Engagement and Interaction

Gallery Walk

Gallery Walk using the Blog function of LMS or pages in an eportfolio with comments activated

Content

- Poster, picture, graphic, short presentation
- Mnemonics
- Concept maps/infographics to illustrate a key point of class or relationships

Example: Online Gallery Walk using Blogs and Journals

- Readings on a topic
- Students created a “poster”
- Poster was inserted in a class blog
- Students reviewed the class blogs
- Students then used the information from the blog to create a journal final summary that was used to assess the topic

Surveys

Student or student group creates a survey

- Suggested: Google Forms, Survey Monkey
- Results shared in Blogs / Discussion Boards / personal portfolios

Content

- Classmates take the the survey
- Group or student analyzes data and presents interpretation
- Classmate participants comment and critique

Potential LMS Features facilitating Interaction

- Discussion Board
- Blog
- Wiki
- Journal

Discussion Board Protocols

For deeper or multi-step discussions
consider protocols

Going Online with Protocols: New Tools for Teaching and Learning. By Joseph P.McDonald, Janet MannheimerZydney, AlanDichter, and Elizabeth C.McDonald. New York, N.Y.: Teachers College Press, 2012

Video Tools facilitating student interaction with content

- Ed.ted
- Videos with embedded questions or assignments interspersed
- Camtasia

Ed.ted

By adding questions, students can verify they obtained the key points from a video.

By adding discussions, the students can interact with the material and each other and the instructor can better assess learning.

Ed.Ted

The screenshot shows the TED Ed website interface. At the top, there is a browser address bar with "ed.ted.com" and a search bar. The main header features the "TED Ed Lessons Worth Sharing" logo on the left and navigation links for "Register or Log In", "TED", "Blog", "Get Involved", "FAQ", and "About" on the right. Below the header is a red navigation bar with "Lessons Series Clubs" and a search input field. A light blue banner below that contains the text "Build a lesson around any TED-Ed Original, TED Talk or YouTube video" and a prominent "Create a Lesson" button with a plus icon. The main content area displays a horizontal carousel of lesson cards. The first card on the left features a cartoon character and statistics: "208,916 Lessons Created" and "12,085,225 Questions Answered". Other cards in the carousel include an underwater scene, a green alien, a shark, a sandwich, and a red background with cartoon animals.

Search bar with magnifying glass icon

Create a Lesson

A great TED-Ed Lesson page starts with a great video!
