

# EDUCATING THE EDUCATOR FROM INSIGHT TO ACTION!

Demystifying Quality Matters for USF Faculty

## Who We Are

Digital Learning partners with USF faculty to develop and deliver high-quality engaging online courses that meet the needs and expectations of today's learners. Focusing on learning outcomes, student experience, and the development of media-rich interactive content, Learning Designers, Videographers, Multimedia Developers and Faculty Support professionals work collaboratively to reimagine learning in a digital space.

## STRATEGY 1

### Data, Deliberate, Decide!

Let the facts guide you. At USF, data drives decisions. Analysis of the dataset from tracked QM results led to a "top 10" QM standards commonly not met. A Resource Center for faculty was created to address these standards.

## STRATEGY 2

### Say It and Mean It!

Deliver a message of collaboration. Review and revision in partnership with faculty is paramount. Clearly identified roles, responsibilities and expertise allowed for a successful collaboration.

## STRATEGY 3

### Partners United!

Establish successful relationships. Flexibility with faculty is the pathway to success. From a consultative DIY approach to months of intensive development with Learning Designers, faculty prefer a personalized experience. The outcome: a high-quality online course that meets outcomes and the needs of today's learners.
