Key Findings

Courses taught by Quality Matters-trained faculty have a lower percentage of non-passing grades compared to the University overall.

This trend is consistent across most Colleges and various student demographics, including:

- Low-income vs. Not low-income
- First-generation vs. Non-first-generation
- URM (Underrepresented Minority) vs. Non-URM

Critical Questions to Consider

How can this data be used to drive decision-making on your campus?

What additional data points or search filters should be included in the dashboard to enhance insights?
