A Quality Matters Event

Q-Up K-12 for Digital Quality

Qtips

1. Including a variety of individuals on your team allows you to bring in valuable perspectives and draw on each individual's area of expertise and strengths.
2. Using templates allows you to consistently incorporate research-based strategies into your process
   - Backwards Design - Merrill's Principles of Instruction - Quality Matters
3. Creating a quality course starts with having a quality plan. Use backward design throughout the process. Start with a clear picture of your goals and keep those in mind throughout the process. (Hint: Templates can help with this, too!)

If you fail to plan, you plan to fail.

Reflect

1. What does your current course development process look like? Who makes up the team?
2. Do you follow any instructional design models? How do you incorporate research-based strategies into your process?
3. In what ways can you improve your current process?

Don't Forget

Questions

Q-it Up

How will you use what you learned? List your ideas.
