We're Not *Just* in Kansas Anymore:  
Faculty Perspectives on Online Course  
Development and Delivery

# Context of the Study

- ▶ Midwest teaching university – approximately **7,500 students/400 instructors**
- ▶ Growing online course/program offerings (**150% increase**)
  - ▶ Professional Development Center
- ▶ Program initiative
  - ▶ **Cohorts** – emphasis on quality online instruction
  - ▶ Quality Matters **trainings/Peer reviews**
- ▶ Participation
  - ▶ **< 15%** faculty
  - ▶ Less than half completing peer review training

# Research Focus

Perceptions,  
attitudes, and  
experiences  
influencing  
faculty  
participation

Impact of  
QM  
professional  
development  
on faculty  
confidence

Impact of  
QM  
professional  
development  
on other  
areas of  
teaching

# Demographic Overview

- ▶ 43% response rate/tenure and non-tenured
- ▶ Age range under 40 – 60+ years
- ▶ All academic areas represented
- ▶ < 1/3 reported participation in online course as a student

## Training for Teaching Online/Hybrid Courses

# Challenges

- Simulating classroom experiences
- Communication
- Interaction
- Academic honesty
- Content design/ delivery
- Engagement

# Effectiveness of Online Course Delivery

- ▶ 64% believe online course delivery is effective
- ▶ Implementation is the key factor
- ▶ Student motivation/commitment impact effectiveness

*The effectiveness is completely dependent on the instructor's ability to build a course that engages students differently and allows them to experience the material authentically...there is NO SHORTCUT to doing effective teaching.*

*I think people for the most part are afraid that we are going to lose that educational importance of being in a brick building, that we can't be able to deliver the same quality overall online. I think there are so many online classes at a variety of institutions that there is no quality control...you are going to get a generation of students who haven't had a decent education.*

# Increasing Likelihood of Attendance

Offer incentives

Be discipline specific with offerings

Provide greater availability of offerings

Provide different levels of training

Increase visibility of times and program content

Require it

# Quality Matters Professional Development

Biggest deterrent = **time**

Major benefit – impact on **all** areas of teaching

# Quality Matters Impact on Other Areas of Teaching

Theme	Survey Results	Interviews/Focus Group Results
<b>Course organization</b>	<ul style="list-style-type: none"> <li>- More methodical approach</li> <li>- Excellent guidance in using LMS</li> <li>- Improved organizational structure</li> </ul>	<ul style="list-style-type: none"> <li>- Made flow of all courses better</li> <li>- Helped with student navigation in other online courses</li> <li>- Makes sure course itself doesn't interfere with the learning</li> </ul>
<b>Alignment</b>	<ul style="list-style-type: none"> <li>- Clearer connections</li> <li>- Structuring objectives to match activities/assessments</li> <li>- Increased awareness of importance of alignment</li> </ul>	<ul style="list-style-type: none"> <li>- Alignment of course objectives with what is being taught</li> <li>- Thinking about alignment now "very important"</li> </ul>
<b>Assessment</b>	<ul style="list-style-type: none"> <li>- Better at meeting standards</li> <li>- Awareness of need for student understanding of connection between objectives/assessments</li> <li>- More concise about expectations</li> </ul>	<ul style="list-style-type: none"> <li>- Minimal mention of assessment impact by qualitative participants</li> </ul>
<b>Traditional (face-to-face) Courses</b>	<ul style="list-style-type: none"> <li>- More mindful of use of LMS for traditional classes</li> <li>- Impacted alignment/assessment in traditional courses</li> <li>- Approach traditional classes more methodically</li> </ul>	<ul style="list-style-type: none"> <li>- 100% reported impact</li> <li>- Impact on organization of traditional classes</li> <li>- Traditional class approach more focused on objectives and alignment</li> </ul>

# Confidence

*When I started teaching I had no training in that area so it just evolved over time. I am sure I wasn't great in the beginning and it took a long time for me to feel like I even knew what I was doing. I knew my content, but I really wasn't sure how to present it. With the QM training, I feel like when it comes to my online courses I not only know my content, but I know how to present it in a way that works for the me and the students.*

# Discussion

- **Misconceptions** and **uncertainty** regarding online course delivery continues to be an issue across disciplines
- Faculty value pd for online teaching and support continued emphasis but feel the **time** investment is a hurdle
- Though **intrinsically motivated** to participate, faculty desire some type of **extrinsic reward**
- Quality Matters impacted other areas of teaching including a **strong impact on traditional course delivery**
- Quality Matters provided participants with **greater confidence** in their ability to effectively design an online course
