Design Tools by Cidi Labs

Cidi Design Tools for Canvas

One Package, Many Tools, One Price.

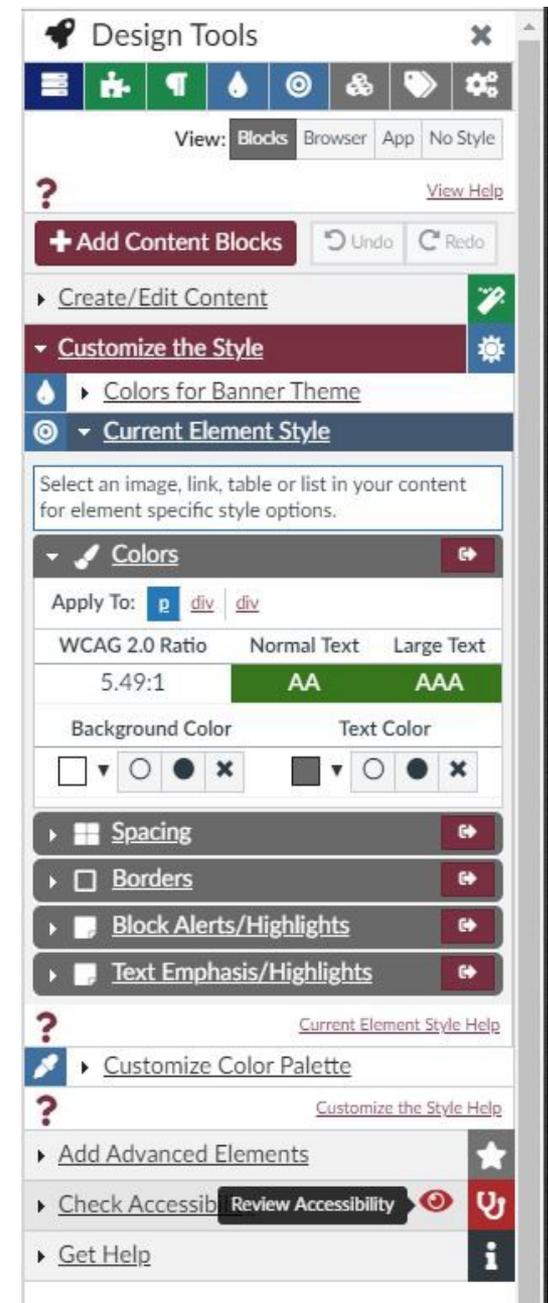

Design Tools is comprised of three tools that work together to help you rapidly scaffold, design and style Canvas courses and content. Be a course hero, just like that.

Content Editor Tool

- Create, customize, and style content for **interactive and engaging courses**
- Insert interactive widgets, html snippets, or quick checks to enhance learning outcomes
- Accessibility tools in Design Tools augments Canvas with **page-level checks** to ensure color contrast, proper table formatting, appropriate image alt- text, proper page heading structures, and link checking

Overview of Adoption Process

- Showed Dean how “slick” courses could look
- CTLT purchased Cidi Labs for COE
- Met with Chair & Faculty teaching in new program
- Program specific info, policies, layout, etc.
- Created a “mock up” for feedback

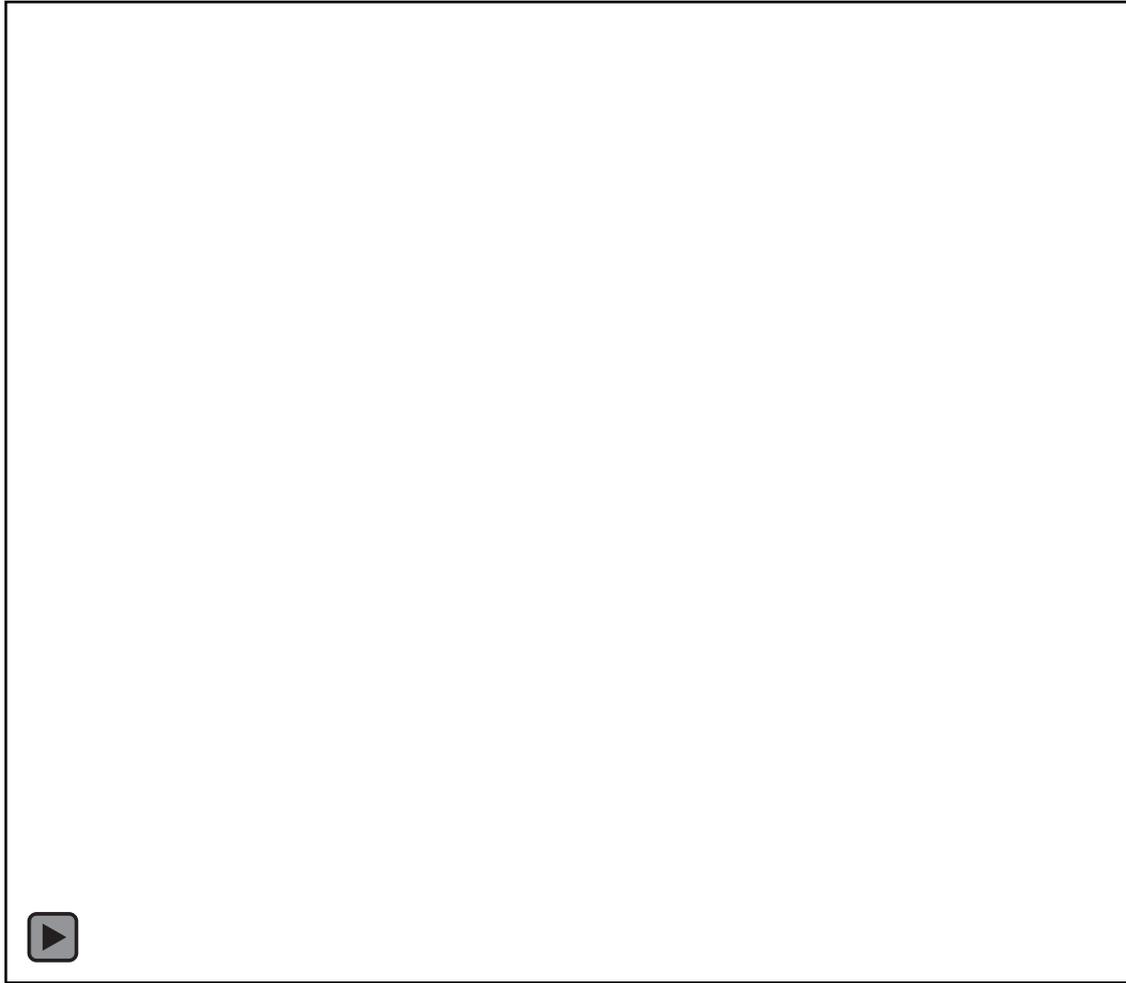

Syllabus – Policies Template

2 More Treats (LTI's)

1. Multi-Tool
2. Image Embed Tool

Multi-Tool

- Module builder creates course **modules with one click**
- Due date modifier manages **all assignment dates from a single screen**
- Scaffold a course shell
- Use templates to create pages

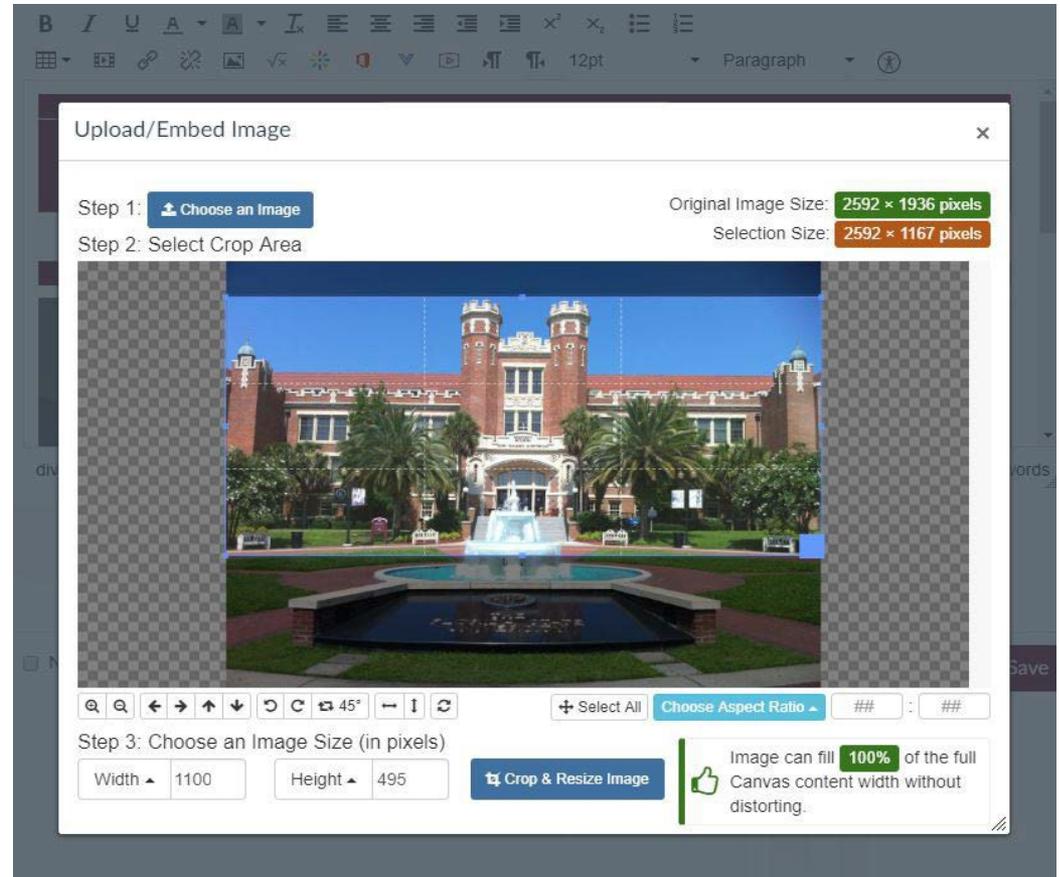

The screenshot displays the 'Module Builder' interface. At the top, a green header contains the title 'Module Builder' and a help icon. Below the header, a white box lists the tool's capabilities: 'Create new modules or add to existing modules', 'Add assignments, content pages, discussions, text headers, and quizzes', and 'Duplicate existing content (except quiz questions, hope to add those in the future)'. The main area is divided into two sections: 'Existing Modules' and 'New Modules'. The 'Existing Modules' section shows a list of modules, with 'Module 1: What is a Derivative?' expanded to show its contents: 'Derivatives Assignment #1', 'Derivative Problem Assistance', and 'Derivative Quiz'. Each item has a '0' in a box, likely representing a count or due date. The 'New Modules' section features a 'New Module Pattern' form with fields for 'Module Prefix' (set to 'None'), 'Number of Modules to Create' (set to '0'), and 'Starting Number' (set to '1'). A 'Generate Module List' button is located at the bottom of this section.
