

## Quality Assurance Resource Repository (QuARRy)

The Quality Assurance Resource Repository (QuARRy) is a collection of online teaching-learning exemplars collected from participants in the [CSU Quality Assurance](#) program. It is organized according to the extensive [CSU Quality Online Learning and Teaching \(QOLT\)](#) instrument and is also cross-indexed to the Quality Matters rubric. This allows faculty and instructional staff to view multiple ways a particular objective may be effectively met, whether making changes to one's own course or assisting someone else to do so. You can search the QuARRy by an author, type, keywords, or drill down into a specific QOLT/QM Community and view specific objective numbers (i.e., QM 1.3, QOLT 1.1). Our hope is that QuARRy will continue to grow in number and quality of exemplars. We invite contributions of additional resources using the QuARRy submission form.
